

# ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

**Date/Time:** November 5, 2001/11:00 a.m.

**Site Contact(s):** Chris Gilbreath  
**Phone:** 303-966-7355

**Regulatory Contact:** Denise Onyskiw  
**Phone:** 303-692-3371

**Agency:** Colorado Department of Public Health and Environment

**Purpose of Contact:** Notification for the Removal of Caustic Storage Tanks 176 and 185 (aka Tank 38)

## Discussion

The sodium hydroxide tank (T-176) and the potassium hydroxide tank (T-185 aka tank 38) located outside Building 774 are identified in the Building 771 DOP as Type 2 facilities. Both tanks were previously used as caustic feed tanks. During the development of the RLCR Supplement, the Site did not complete the PDS on the tanks due to inaccessibility. As a result, these tanks were classified as Type 2 facilities due to potential contamination (status was unknown) and the potential presence of asbestos.

On November 1, 2001 samples were collected from each tank. The samples are currently being evaluated for radiological and metal constituents.

All asbestos will be removed prior to tank dismantlement. Once the asbestos has been removed, residuals within the tanks will be removed as necessary to facilitate proper disposal of the tanks. Following the removal of residuals, the tanks will be surveyed and released per RSP-09.01 (Unrestricted Release procedure) or dispositioned as SCO. The Site will provide the CDPHE with the release evaluation, as requested.
